

Flag Staff Mount Installation – Lincoln MKT
Part #: 40194

Note: Before starting this procedure, it is a good idea to protect the top of your fender with some masking tape or electrical tape. It will save the finish if you slip during the installation.

1. Pull up on plastic trim on top of the wheel well to expose the hex bolt for securing the fender.
2. Loosen the 10mm hex bolt closest to the head light.
3. Slide the appropriate mount (left or right) under the head of the bolt.
4. While holding the mount in position, re-tighten the bolt.
5. Snap the plastic trim back into place.
6. Install flag staff base to the mount.
