

DNR
INDUSTRIES LIMITED

DNR Industries Limited was introduced to the hearse industry in 1988 and since then has grown to become the major supplier to coachbuilders worldwide. In addition to manufacturing and supplying hardware to coachbuilders, DNR also supplies hardware for the limousine industry.

The majority of the company's components are made from tooling DNR has developed. As a result, DNR can engineer and manufacture custom parts to individual specifications. These custom parts give a unique look to any coach, which will be exclusive in the industry.

Our Customer Commitment

DNR consistently recognizes and responds to customer expectations and to today's ever-changing technology, while supporting mutual long-term growth and profitability.

Our business philosophy has not changed since inception. In an industry where global competitiveness is standard, DNR Industries utilizes state of the art design and manufacturing experience. DNR's quality management program assures its customers of the highest standards on which they have come to depend on.
